Guarulhos, SP - Brazil

PROFILE

With more than 15 years of experience in web development, I became a full-time front-end developer in 2016. I've worked in many fields of front-end development - including but not restricted to mail marketing creation, development of internal tools, development of complex e-commerce systems, and more. I'm also responsible for the training sessions for new team members and for the integration between the front and back-end. I make use of my backend and database knowledge for personal projects.

Besides code quality, I believe the success of a project is directly related to the team's relationship, communication, and knowledge sharing. Those are resources I always bring into the projects I'm working on.

GRADUATION

Systems Analysis and Development Technology
Instituto Federal de São Paulo, Câmpus Guarulhos.
